Yes ... I think we should. Hopefully this will get transferred over really quickly.

David

David,

Do I put the TC stc into the bluefiles?

Kim

Subject: FW: Approval Letter and Amended STC SR00211SE

Bill,

The FAA has re-issued SR00211SE for the AS 350/355 shoulder harness kits to call out Dart paperwork and drawings.

In talking to Peggy, it is my understanding that when Geneva has had no stock for this kit, she has purchased shoulder harness kits from Heli-Lynx, who make a very similar product, and re-sold them to customers in order to meet their contract requirements.

Therefore, I think it is in Dart/Geneva's best interest to ALWAYS have these kits in stock so that we don't lose out to Heli-Lynx.

Kim/Leanne,

Please go ahead and release on an ECN.

Send me the Canadian STC so that I can get it re-issued in Dart's name with the Dart paperwork.

Might as well send me the one for the Dual Controls at the same time cause we're going to get that one soon too.

Steve/Chris,

Really need the compliance documents so that we go after EASA certification

of these kits. My apologies if you have already sent this stuff to us. I haven't seen it. As promised, the revised STC leaves the Geneva paperwork as Configuration A and the new Dart paperwork is Configuration B.

Sian/DHS,

Leanne is probably going to talk to you about this, but just a reminder, I think that the 2008 catalogue should call out both the Dart part number for these kits as well as the Geneva part number for these kits for customer convenience. Same with the Dual Controls. I am sure Leanne can provide all the part numbering cross reference information as well as the approved Installation Instructions if you need it for reference. Leanne has done a nice job Dartifying this product and making small changes that will make it easier for Dart to manufacture the kits.

David
